

PC ASSEMBLE

This is my first time opened a PC.I learned a lot during this class especially about components in PC that I never know before.This is truly an eye-opening experience.Components like power supply,hard disk drive and heat sink are few of the important components in PC.Our Dr which is Dr Iqbal taught us how to reassemble and assemble the PC step by steps with clear instruction.The assistant lecturers also there with us to guide us throughout this class.After this class,Dr Iqbal held a short quiz as our assessment so we can enhance our understanding on the class before.
